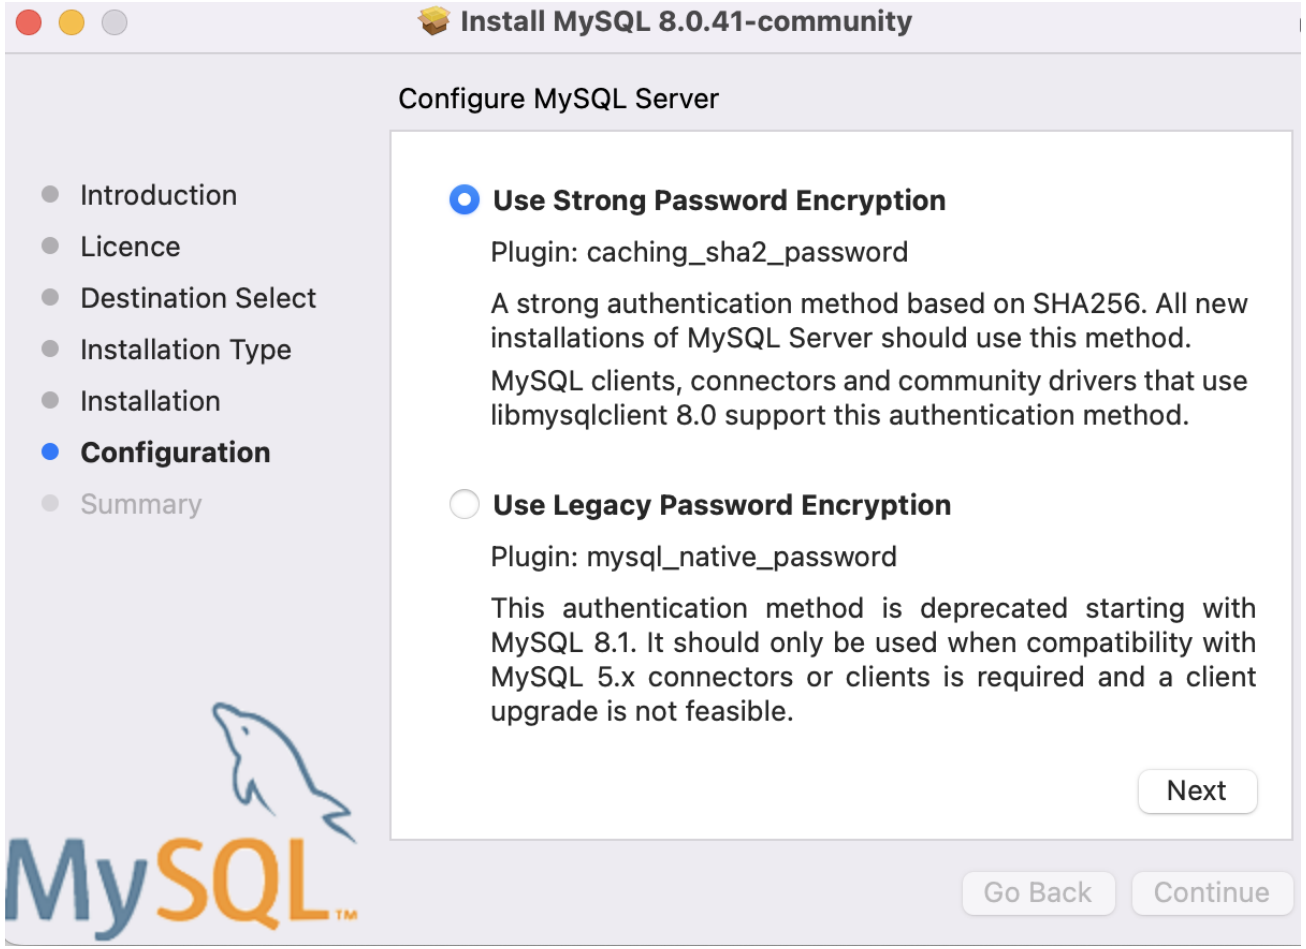
Go Back
Continue

After several steps, you start to install

In the configuration, use strong password



Install MySQL 8.0.41-community
Configure MySQL Server
Introduction
Licence
Destination Select
Installation Type
Installation
Configuration
Summary
Use Strong Password Encryption
Plugin: caching_sha2_password
A strong authentication method based on SHA256. All new installations of MySQL Server should use this method.
MySQL clients, connectors and community drivers that use libmysqlclient 8.0 support this authentication method.
Use Legacy Password Encryption
Plugin: mysql_native_password
This authentication method is deprecated starting with MySQL 8.1. It should only be used when compatibility with MySQL 5.x connectors or clients is required and a client upgrade is not feasible.

MySQL Workbench 8.0.41

Select Operating System:

macOS

Select OS Version:

All

Packages for Sequoia (15) are compatible with Sonoma (14)

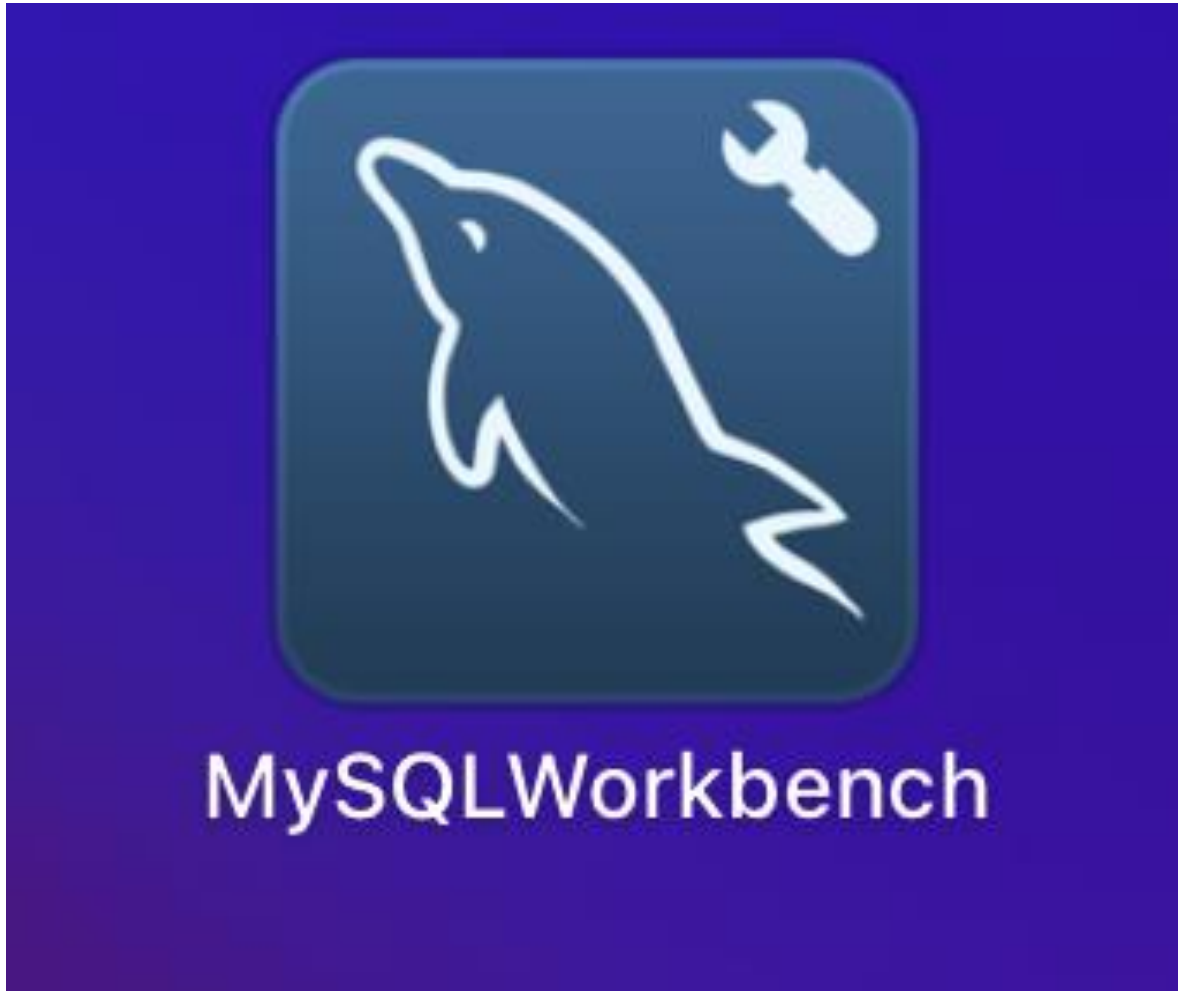
macOS (x86, 64-bit), DMG Archive	8.0.41	121.5M	Download
(mysql-workbench-community-8.0.41-macos-x86_64.dmg)	MD5: 3a9a8b22ca8eb794bbaa83c4afba3b10 | Signature		
macOS (ARM, 64-bit), DMG Archive	8.0.41	118.6M	Download
(mysql-workbench-community-8.0.41-macos-arm64.dmg)	MD5: 8d258c82b70a22e1d314973591942988 | Signature		

We suggest that you use the MD5 checksums and GnuPG signatures to verify the integrity of the packages you download.

Apple silicon choose this

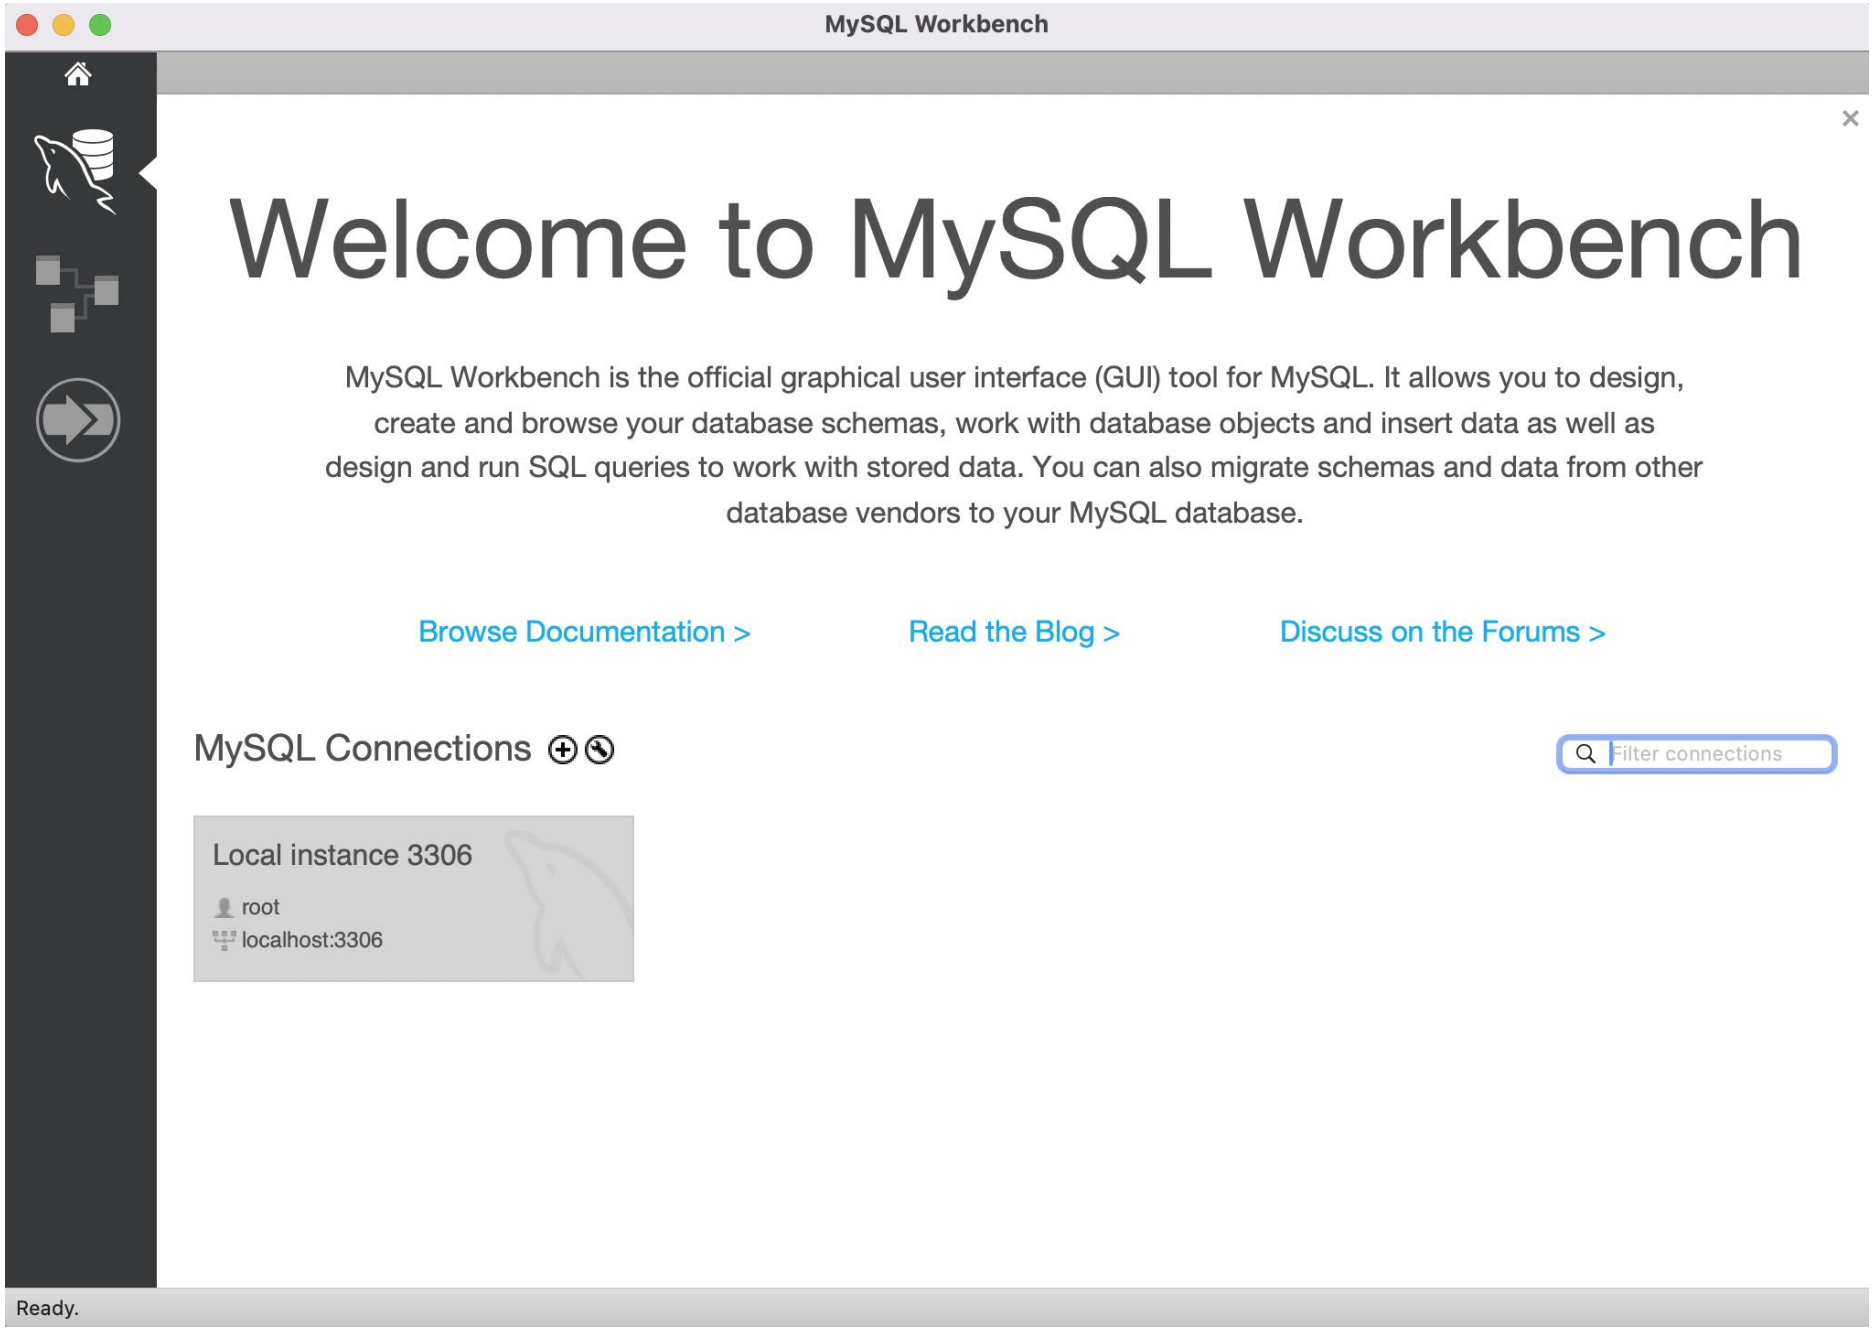
Following the installation guide
Workbench should be installed

You should see the MySQL Workbench Icon in
Start Menu in Windows or,
Launchpad in MacOS



MySQLWorkbench

Open the application
and you should see the following



MySQL Workbench
Welcome to MySQL Workbench
MySQL Workbench is the official graphical user interface (GUI) tool for MySQL. It allows you to design, create and browse your database schemas, work with database objects and insert data as well as design and run SQL queries to work with stored data. You can also migrate schemas and data from other database vendors to your MySQL database.
